Mohammad Nadeem

B.Tech in Computer Science and Engineering (Data Science)
07466399483 | nadeemmohammad.0021@gmail.com | Portfolio | LinkedIn | GitHub

Professional Summary

Detail-oriented Computer Science and Engineering graduate with a specialisation in Data Science and hands-on experience in data preprocessing, exploratory data analysis, machine learning, and web development. Familiar with identifying data quality issues, debugging processing workflows, validating outputs, and testing application functionality. Experienced in developing Python-based analytical projects and machine learning applications. Strong problem-solving skills, attention to detail, and commitment to producing reliable, maintainable software and trustworthy data-driven results.

Technical Skills

Programming Languages: Python, Java, SQL, JavaScript (Basic), HTML, CSS
Data Analysis: Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis, Data Cleaning, Data Validation
Machine Learning: Scikit-learn, TensorFlow, Keras, CNN, NLP, Model Evaluation, Feature Selection
Testing and Debugging: Data Quality Checks, Missing-Value and Duplicate Checks, Output Validation, Error Identification, Code Debugging, Functional Testing
Frameworks and Tools: Flask, Django, Git, GitHub, Jupyter Notebook, Visual Studio Code, Chrome DevTools, Google Cloud Platform
Core Competencies: Problem Solving, Analytical Thinking, Software Development, Data Reliability, Attention to Detail, Performance Optimisation, Collaboration

Experience

Software Engineer Intern – Data Science April – May 2024
SAK Informatics *Remote, India*

- Prepared and managed datasets for analysis, checking data quality and consistency before using them in analytical workflows.
- Performed data preprocessing and reviewed datasets for missing values, duplicate records, and inconsistent entries where applicable.
- Investigated preprocessing and analysis issues by reviewing data transformations and validating outputs to improve reliability.
- Supported predictive modelling and refined data preparation workflows to produce consistent inputs for analysis.

Software Engineer Intern – Web Development October – November 2024
CodSoft *Remote, India*

- Developed three responsive websites using web technologies, focusing on usability, layout consistency, and functional requirements.
- Identified and corrected front-end issues by reviewing HTML, CSS, and JavaScript behaviour during development.
- Used GitHub for version control and maintained project changes to support a more organised development workflow.
- Reviewed website behaviour across layouts and screen sizes to identify display and responsiveness issues.

Software Engineer Intern – Data Science October – November 2024
Prodigy Infotech *Remote, India*

- Performed exploratory data analysis to understand dataset structure, distributions, and relationships between variables.
- Prepared data for machine learning by reviewing features and checking the consistency of preprocessing outputs.
- Evaluated analytical and modelling results to identify potential data or feature-selection issues.
- Refined analysis workflows and reviewed outputs to support more reliable model development.

Projects

ChatGPT Review Sentiment Prediction Model (GitHub)

Python, VADER, TextBlob, Pandas, Matplotlib, Seaborn

- Analysed more than 500 user reviews to identify sentiment patterns and generate visual insights.
- Prepared and processed review text for sentiment analysis, checking intermediate outputs for inconsistencies.
- Compared sentiment outputs from VADER and TextBlob to examine differences in classification results.
- Reviewed visualisations and analysis results to ensure that reported insights were consistent with processed review data.

DermAI Assistant – Smart Dermatology Diagnostic Tool (GitHub)

Python, Flask, CNN, TensorFlow, OpenCV, HTML, CSS, JavaScript

- Developed a CNN-based image classification application for skin disease prediction, achieving a reported classification accuracy of 85%.
- Worked with image preprocessing and model inference workflows, reviewing inputs and outputs to identify processing issues.
- Integrated the model with a Flask application to support image submission and display prediction results.
- Reviewed model performance and inference behaviour to support improvements in application reliability.

Criminal Face Recognition System (GitHub)

Python, OpenCV, face_recognition, HTML, CSS, JavaScript

- Developed a face recognition application using Python and OpenCV for image processing and recognition.
- Reviewed recognition outputs and alert behaviour to check whether the application responded as expected to input images.
- Worked on real-time recognition and alert functionality, with reported recognition accuracy of 90%.

We2Work – Team Collaboration Web Platform (GitHub)

HTML, CSS, JavaScript, Flask/Node.js

- Developed a collaboration platform with task tracking, messaging, and project progress features.
- Reviewed task updates and dashboard metrics to ensure that displayed progress reflected the available application data.
- Worked on application functionality and user interface behaviour to support a consistent user experience.

Personal Portfolio Website (GitHub)

HTML, CSS, JavaScript

- Built a responsive portfolio website showcasing projects and professional certifications.
- Reviewed page layouts and navigation behaviour to identify display issues and improve usability across screen sizes.

Education

Kommuri Pratap Reddy Institute of Technology (KPRIT) — Ghatkesar, Telangana, India
B.Tech – Computer Science and Engineering (Data Science), CGPA: 7.72/10 — *2022 – 2026*

Telangana Minority Residential Junior College (TMRJC) — Bhongir, Telangana, India
Higher Secondary Certificate, 87% — *2020 – 2022*

Telangana Minority Residential School (TMRS) — Bhongir, Telangana, India
Secondary School Certificate, 98% — *2019 – 2020*

Certifications

Data Science Internship – SAK Informatics *(2024)*

Web Development Internship – CodSoft *(2024)*

Data Science Internship – Prodigy Infotech *(2024)*

Learnathon – ICT Academy *(2024)*

Generative AI – GUVI *(2024)*

Game Development using PyGame – GUVI *(2024)*

Python Programming – GUVI *(2023)*

HTML – Great Learning Academy *(2023)*
